Hi Noah,

I know you are super busy, but wanted to see what you recommend we do next on this?

From: (b) (6)
Sent: Friday, April 24, 2015 3:18 PM
To: 'Noah Kunin - Q0B'
Subject: 18F speaking engagement with DHS CIS at AWS Govt Symposium

Hi Noah,

AWS Worldwide Public Sector will be hosting our 6th Annual AWS Government, Education, and Nonprofits Symposium June 25 - 26, 2015 at the DC Convention Center and Marriott Marquis Hotel. We will be bringing together over 3000 people from our Government, Education, and Nonprofit customer and partner ecosystem to network and learn about the latest trends, best practices and ways organizations are driving innovation, savings and efficiencies using the cloud. (<http://aws.amazon.com/events/wwps/symposia/washington/>)

The two day event will feature key themes that are top of mind including practical examples of paths to the cloud; Breaking the Mold in IT Government; Time to Science; Transforming (education, government, Science) in the Cloud; More Mission for the Money; Crowdsourcing: the New Public Service Provider and more. We would very much like to invite one person from 18F to participate in our keynote vignette. For our keynote programming, we select 2-3 public sector customers leading high impact innovations. We couldn't think of greater impact than the innovations you are driving at 18F. These are intended to be short 10 minute talks featuring the great work you are do and the impact you have on so many alongside Teresa Carlson, Vice President for Public Sector. I've included a link to the [PBS](#) and [EdX](#) video vignettes we filmed recently to give you a sense of the style of the talk. I know that Teresa would love for you to share your story. Having you share the latest on how you are transforming government would add tremendous value to the program. We would also be happy to incorporate a more detailed session in one of our tracks perhaps either the Cloud in the Headlines track or the Transformation and Innovation one in addition to the keynote vignette if that's of interest.

Please let me know if this is something you'd be interested in doing. We are confirming our speakers and hope to have a near final program by the end of the month. We've already secured leaders from NASA, UNICEF, Nationwide Children's Hospital, GenomeNext, Department of Homeland Security, NGA, King County, Department of Education, FDA, Baylor School of Medicine and many more. Look forward to hearing back.

Thank you,

(b) (6)

Trying to figure it out now. May be a small group, as our DevOps/admin hiring is not performant yet [but looks like we just made 2 offers!]. So it may be only three or four of us because that's who's actually doing all the work.

Noah, please forward on to the group.

All, please reply to me with any other topics.

- Sophisticated cost modeling from a client services perspective [clients will get push button/ PaaS like features from us]
- TLS/SSL/CAs and HB management [we're already supporting, and will have to spin up a ton more, unique TLS/CAs for top-level domains. Clients want to see their [xxx.gov](#) instead of a [yyy.gsa.gov](#).]
- AMI / Gold Mastercontrol - how to track AMI lineages and forks

Best Regards,

Nope, and now we're sort of in hot water and **need urgent action to raise our quota**. I did file a separate ticket the same day, in addition to leaving a VM and filling out the contact form.

Here's the reply I got for ticket (b) (4)

Hello,

My name is (b) (6) thanks for your query in relation to AWS GovCloud.

To reach an Amazon Web Services GovCloud (US) Region Business Representative, you can call them directly on 703-561-9600.

Alternatively, you can complete a Contact Request form located via the link below. Once submitted, an Amazon Web Services GovCloud (US) Region Business Representative will contact you.

<https://aws.amazon.com/govcloud-us/contact/>

Have a brilliant day.

Best regards,

(b) (6)

So, in switching from our p-card to an invoice via InfoReliance, it appears that all of our historical data via Cost Explorer has vanished. :/

While I have some snapshots locally, it would be fantastic if we could get it back.

Interested, but we would probably learn more from them than the other way around, and I need to crash on stuff before I leave for NYC.

As context, @CFPB all of our sensitive financial services projects couldn't even go into the cloud (maybe next year) and @18F we still haven't onboarded the Healthcare.gov team.

You should totally reach out to Phil directly and see if they have time.

Fire to fire. Sorry I couldn't call back.

Here's what happened. The GSA procurement team was not as...performant...as I hoped. We are now on a bridge vehicle with InfoReliance as a reseller. We can use this vehicle and its bigger ceiling starting on invoices for May 1 and going forward. Turns out we can't use it to pay the April invoice we already owe, and I'm being told it will take 30-45 days to get a retroactive vehicle ready to pay for April.

As you can tell, this worries me greatly, as I'm worried our AWS account will turn off in 11 days when we cross the 15-day non-payment threshold.

While I will be inquiring through InfoReliance as well, I'm trying to secure assurances that when we cross the threshold our account won't auto-turn off. Happy to pay whatever fees or interest are accrued for late payment when the retroactive vehicle becomes available.

Subject: Re: quick call today?

Fire to fire. Sorry I couldn't call back.

Here's what happened. The GSA procurement team was not as...performant...as I hoped. We are now on a bridge vehicle with InfoReliance as a reseller. We can use this vehicle and its bigger ceiling starting on invoices for May 1 and going forward. Turns out we can't use it to pay the April invoice we already owe, and I'm being told it will take 30-45 days to get a retroactive vehicle ready to pay for April.

As you can tell, this worries me greatly, as I'm worried our AWS account will turn off in 11 days when we cross the 15-day non-payment threshold.

While I will be inquiring through InfoReliance as well, I'm trying to secure assurances that when we cross the threshold our account won't auto-turn off. Happy to pay whatever fees or interest are accrued for late payment when the retroactive vehicle becomes available.

AWS will be in town on May 29th. They're giving us some time to just go to town on technical questions and best practices. If anyone has topics, please let me know so I can forward on so they can prep. There will be a call-in / screen share available.

AWS Q&A for GSA 18F

- Noah, please forward on to the group.
All, please reply to me with any other topics.
- Sophisticated cost modeling from a client services perspective [clients will get push button / PaaS like features from us]
 - TLS/SSL/CAs and ELB management [we're already supporting, and will have to spin up a ton more, unique TLS/CAs for top-level domains. Clients want to see their [xxx.gov](#) instead of a [yyy.gsa.gov](#).]
 - AMI / Gold Master control - how to track AMI lineages and forks

H Tracy. Hope all is well.

We have a new solution in place for web services with InfoReliance.

We need to close the loop with AWS, including provide an update regarding the April Invoice and payment method.

Please send me the point of contact(s) for AWS.

Thanks.

Pia

Hi, (b) (6) -

Yes, autoscaling is available in AWS GovCloud, just not in the console. You can use the AWS Elastic Wolf Client Console, CLIs, or APIs to configure it.

Best regards,

Noah – glad we got to catch up this weekend. I wanted to follow up on the idea of having 18F participate in our [public sector symposium](#) in DC on June 24th. Specifically, our team is hosting a session titled “Crowdsourcing: The New Public Service Provider” that features customers who are tapping those outside their organization to create public service solutions. Potential participants include City of Chicago ([Forking Your City](#) example) and City of Boston ([Street Bump](#) app example.) We think various aspects of 18F’s work exemplify this theme and we would love to have you or someone else on the team give a ~10 minute presentation in the session. Is this something you’d be interested in doing? If so, what are next steps to confirm? Thanks! (b) (6)

I've been following that link as well - I already have a ask out to AWS re Govcloud to clarify if "...updated in all Regions" is inclusive of GovCloud or not.

Subject: Re: [CRITICAL BUG IN OPENSSL] Over-reads can compromise keys

We currently have the following version in fbopen and 18f. This requires upgrade to version 1.0.1g and rebuild of fips module.

OpenSSL 1.0.1f-fips 6 Jan 2014 (OpenSSL FIPS Object Module 2.0.5)

Thanks

<http://web.nvd.nist.gov/view/vuln/detail?vulnId=CVE-2014-0160&cid=2>

<http://heartbleed.com/>

TLDR: buffer over-reads can compromise keys

IMMEDIATE STEPS:

Confirm the version of OpenSSL we're using.

Versions 1.0.1 -> 1.0.1f are **vulnerable**

1.0.0 and 1.0.1g are **not vulnerable**

If using vulnerable version(s):

Update to version without bug

Revoke keys

Reissue keys

If we used a vulnerable version, assess if PFS was in place

If yes, celebrate <517.gif>

If no, we should immediately spike on what to do

If you need to reach me sooner, I'm at (b) (6)

Noah, could you please relay this to anyone at GSA that might be interested? This is at no charge...

===

Amazon Web Services will be hosting our largest Federal event of the year on June 24 - 26th in Washington, DC.

You will hear from AWS customers and partners on how they are implementing cloud services to drive innovation, satisfy government mandates, realize cost savings, and improve efficiencies. There will be over 50 different breakout sessions that will help you get started, learn how your peers have been successful, or dive deeper into specific solutions. There is no cost to attend this event, but space is limited.

To learn more and register just click on the link below, or copy and paste this URL into your web browser (<http://aws.amazon.com/events/wwps/symposia/washington/>)

Best Regards,

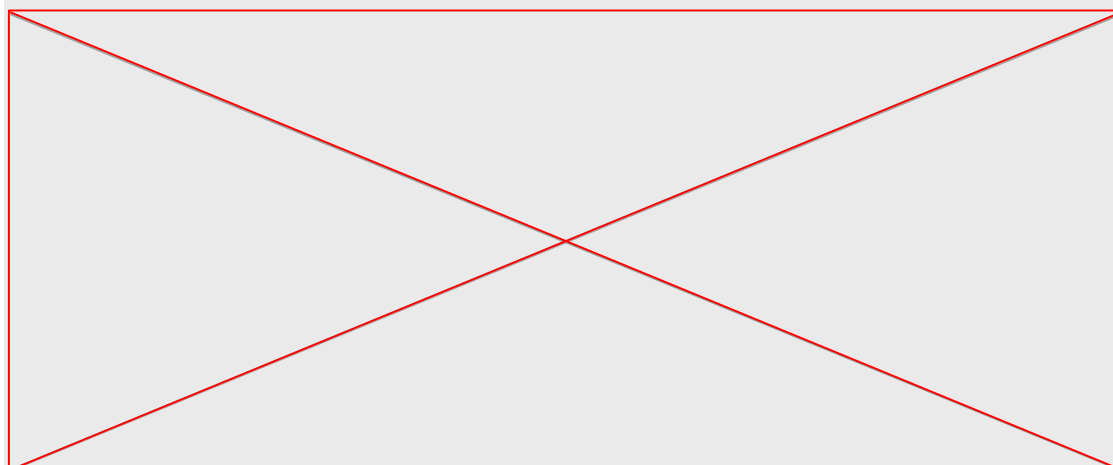

(b) (6)

GovCloud fix still hasn't been rolled out.

@Gerard/Chudi: **can you help escalate on the InfoR side?** Despite going through the normal AWS channels [both filing a ticket and calling] there doesn't seem to be anyone on the other side. AWS East/West had this fixed within hours.

We're dead in the water on several production systems and have cybersec things we need to do that require stopping and restarting instances, whcih we can't do until our quota is raised.

On Wed, May 14, 2014 at 12:00 PM, Noah Kunin - Q0B <noah.kunin@gsa.gov> wrote:

Fixed on E/W. EC2 limit now = 100.

GovCloud fix in progress. Support is a little...clunky on that side of the AWS house.

On Wed, May 14, 2014 at 10:14 AM, Noah Kunin - Q0B <noah.kunin@gsa.gov> wrote:

Hm, I had always read that documentation slightly differently. I read it as "for *each* type of other instance, you get 20", so 20 mediums, 20 smalls, etc. Also, we were already well above 20 total instances anyway before the quota kicked in. Maybe it only triggers every so often as opposed to continuously monitoring your account? *shrugs*

I'm going to ask for clarification on all the above when I file my service limit increase.

On Wed, May 14, 2014 at 10:06 AM, (b) (6) <karsun-llc.com> wrote:

Noah,

There are default limits on most of the AWS resources and for EC2 the default limit is 20 (max-all types of instances). We just need to create a support case to AWS to increase the limit (may be 50) with business justification. We have done this before and it took less than an hr to get the limit increased.

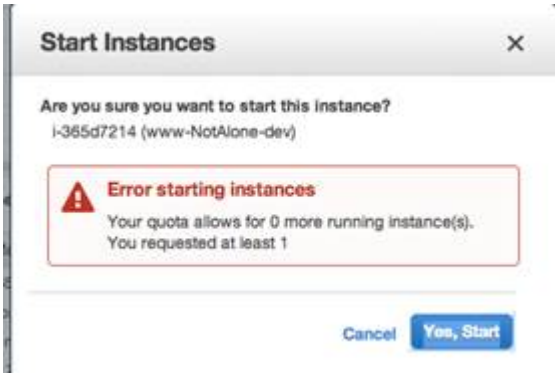

Thanks,

(b) (6)

Subject: [urgent] Quota limits in E C 2GovCloud?

Guess I spoke too soon yesterday.

When either trying to create a new instance of a micro, or just re-starting a medium, we now get this error.

My understanding was that the only instance quotas in AWS were listed here: http://aws.amazon.com/ec2/faqs/#How_many_instances_can_I_run_in_Amazon_EC2

Unless someone can explain what's up, can we escalate to Infor ASAP? We're dead in the water here.

When either trying to create a new instance of a micro, or just re-starting a medium, we now get this error.

My understanding was that the only instance quotas in AWS were listed here: http://aws.amazon.com/ec2/faqs/#How_many_instances_can_I_run_in_Amazon_EC2

Unless someone can explain what's up, can we escalate to Infor ASAP? We're dead in the water here.

Just found a program from last year:

http://d36cz9buwru1tt.cloudfront.net/Concurrent%20Breakout%20Sessions_%201115am.pdf (also attached)

See that GSA's Matt Goodrich spoke last year in the session "FedRAMP: The Path to Successful Navigation onto the Cloud."

On May 14, 2014, at 12:39 PM, (b) (6) amazon.com<(b) (6) amazon.com>> wrote:

Noah, I'm not finding any links to last year's event (but I'll keep looking). In the meantime, there's this coverage of it:

<http://www.xceedium.com/blog/large-crowds-on-hand-for-aws-public-sector-summit>

Notably:

One area of particular interest to attendees was the FEDRAMP ATO secured by AWS earlier this year. In a standing room only session, attendees listened to the principals involved in securing the certification—including Matt Goodrich from GSA, Jennifer Gray from HHS, and James Leach of Veris Group—talk about the process and the benefits the ATO offers.

Hope that's helpful.

Guess I spoke too soon yesterday.

When either trying to create a new instance of a micro, or just re-starting a medium, we now get this error.

My understanding was that the only instance quotas in AWS were listed here: http://aws.amazon.com/ec2/faqs/#How_many_instances_can_I_run_in_Amazon_EC2

Unless someone can explain what's up, can we escalate to InfoR ASAP? We're dead in the water here.

we think we need a long-term solution. we will see what we can work out. thanks.

On Thu, May 15, 2014 at 2:01 PM, Noah Kunin - Q0B <noah.kunin@gsa.gov> wrote:

GovCloud fix still hasn't been rolled out.

@Gerard/Chudi: **can you help escalate on the InfoR side?** Despite going through the normal AWS channels [both filing a ticket and calling] there doesn't seem to be anyone on the other side. AWS East/West had this fixed within hours.

We're dead in the water on several production systems and have cybersec things we need to do that require stopping and restarting instances, whcih we can't do until our quota is raised.

On Wed, May 14, 2014 at 12:00 PM, Noah Kunin - Q0B <noah.kunin@gsa.gov> wrote:

Fixed on E/W. EC2 limit now = 100.

GovCloud fix in progress. Support is a little...clunky on that side of the AWS house.

On Wed, May 14, 2014 at 10:14 AM, Noah Kunin - Q0B <noah.kunin@gsa.gov> wrote:

Hm, I had always read that documentation slightly differently. I read it as "for *each* type of other instance, you get 20", so 20 mediums, 20 smalls, etc. Also, we were already well above 20 total instances anyway before the quota kicked in. Maybe it only triggers every so often as opposed to continuously monitoring your account? *shrugs*

I'm going to ask for clarification on all the above when I file my service limit increase.

Noah,

There are default limits on most of the AWS resources and for EC2 the default limit is 20 (max-all types of instances). We just need to create a support case to AWS to increase the limit (may be 50) with business justification. We have done this before and it took less than an hr to get the limit increased.

Thanks,

Cool, but just FYI, I don't foresee us going beyond 50 instances in GovCloud anytime soon. The future is AWS E/W for everything. I don't have any need to request more than ~30 more instances for our quota at this time.

Good Afternoon,

I want to confirm that you are registered for the upcoming [AWS Government, Education, and Nonprofits Symposium](#) in Washington, DC, from June 24, 2014 until June 26, 2014. We have experienced some technical issues with our e-mail response system and realize that you may not have received the automated e-mail confirmation. We are currently remedying this issue, but in the meantime I wanted to let you know that you are confirmed.

For a list of session titles and confirmed speakers, please visit the event webpage, <http://aws.amazon.com/events/wwps/symposia/washington/>.

If you have any questions please do not hesitate to reach out to me.

I am looking forward to seeing you soon.

Many thanks,

(b) (4) is fully FedRAMPed, just like GovCloud. There are al regions and GovCloud, but I can't think why they would be relevant to an infosec decision when it comes (b) (4). Happy to have discussion with your cyber folks if that would help. Or they can go feast on 3000+ pages of evidence and documentation on all these US regions at the FedRAMP office.

Meanwhile, I'll work with (b) (6) and (b) (6) (adding him, he's the sales exec for CSA as well as some law enforcement/security agencies) to see if we can come up with examples of other US Fed Gov't systems using (b) (4). We need to get permission from those customers to discuss their workloads, in most cases (unless we've already done some kind of public disclosure with them), but for gov't to gov't discussions that's usually fairly easy. I know of at least one very interesting one that I can probably talk about under NDA, coming from one of (b) (6) customers, but need to double-check that one.

Thanks!

Subject: Re: Your tweet

+Aaron Snow, one of the lead developers at 18F

Yep, you were next on my list. :D

TLDR: We need to use R53. Getting flack from cybersec because it's not a GovCloud offering. Now, that isn't a *technical* obstacle, but a compliance one. So trying to find examples of fed cybesec assessments that have already been completed in putting a R53 infront of instances that live in GovCloud.

FWIW, gotten a lot of inquires wanting the same thing from my tweet, but no direct examples yet.

This is semi-urgent for some of our production platforms. We're currently rolling our own redirector, which is not ideal on a variety of levels, especially because it could be solved so elegantly by R53.

(b) (6) FWIW it might be useful to add that US-East-1/FedRAMP info to the [Route 53/GovCloud info page](#) -- at least that's the page I found when I Googled Route 53 + GovCloud. Your story is better than the story there. :-)

On Thu, May 1, 2014 at 3:21 PM, (b) (6) (b) (6) <(b) (6)@amazon.com> wrote:

US-East-1 (where the control plane for R53 resides) is fully FedRAMPed, just like GovCloud. There are tiny compliance differences between the commercial regions and GovCloud, but I can't think why they would be relevant to an infosec decision when it comes to R53. Happy to have discussion with your cyber folks if that would help. Or they can go feast on 3000+ pages of evidence and documentation on all these US regions at the FedRAMP office.

Meanwhile, I'll work with (b) (6) and (b) (6) (adding him, he's the sales exec for GSA as well as some law enforcement/security agencies) to see if we can come up with examples of other US Fed Gov't systems using R53. We need to get permission from those customers to discuss their workloads, in most cases (unless we've already done some kind of public disclosure with them), but for gov't to gov't discussions that's usually fairly easy. I know of at least one very interesting one that I can probably talk about under NDA, coming from one of (b) (6) customers, but need to double-check that one.

Thanks!

Yep, you were next on my list. :D

TLDR: We need to use R53. Getting flack from cybersec because it's not a GovCloud offering. Now, that isn't a *technical* obstacle, but a compliance one. So trying to find examples of fed cybesec assessments that have already been completed in putting a R53 in front of instances that live in GovCloud.

FWIW, gotten a lot of inquires wanting the same thing from my tweet, but no direct examples

yet.

This is semi-urgent for some of our production platforms. We're currently rolling our own redirector, which is not ideal on a variety of levels, especially because it could be solved so elegantly by R53.

+ (b) (6) GSA (and FBI and DHS) sales executive; and (b) (6) from my team, who says he knows you folks ...

First of all, I need to issue a slight correction (I wasn't thinking carefully). While it's true that the basic physical and networking infrastructure as well as core services in US East and US West have a FedRAMP agency ATO (just like GovCloud), it's also the case that only a *core* set of services are within the accreditation boundary. Route 53 is not yet one of those core services. We're gradually adding services (we recently added Redshift) but it might be awhile before Route 53 is officially accredited. That said, any security officer can very reasonably make a risk/benefit decision to include Route 53 within a FISMA accreditation boundary, considering how similar it is to existing accredited services in terms of how it's built and operated. It's also the case that Route 53 is our only service that has a 100% uptime SLA (data plane), which is nice from a broader information assurance perspective.

Second, we're working to find some other examples of federal customers using Route 53 that you can take back to your infosec folks. I'm thinking of a very interesting FBI example but need to make sure they are ok sharing that one.

Third, while we're doing that, please let us know if you would like us to set up some time with your infosec team to walk them through the IA issues and provide the comfort they need.

Thanks!

Indeed! (b) (6) is amazing. And (b) (6) and I have been coordinating as well.

We're currently clearing the deck of projects as we move into the next phase of our operations. Had a bit more work then anticipated, to say the least. I'm heads down on current state cybersec compliance for at least the next 2 business days, but should be able to focus on our future state after that.

Thanks all and have a great weekend!

@ML: the pressing issue we discussed on the phone? Looks like we have a solution in place!

Thanks (b) (6) The meeting yesterday went well. It's very likely we will go with a reseller. Targeting June at the moment.

I'm getting a list of AWS resellers from OCSIT as we speak. What I care about is that there is no intermediation on a technical level. That from the perspective of a developer or a sysadmin, it's as if they purchased AWS off the street. From developer my perspective, I want to make sure I have full access to the billing console [especially the new one you just launched].

Is that the case with most resellers?

On Wed, Apr 9, 2014 at 1:18 PM, (b) (6) amazon.com> wrote:

BTW you will not pay more than AWS commercial list with a federal reseller…often a point or two less…and their terms & conditions are much more federal friendly than our standard click through language…so I would not dissuade you from going the reseller route at all….

I assumed I could get direct access to AWS support. It's that I want to know the reseller doesn't get in the way of my DevOps team. As for billing, couple of reasons.

- I want to understand at a fine-grained level what parts of my infrastructure are costing me more or less and why so we can drive down costs and keep building new things.

- Part of 18F's model is to offer our products and services as SaaS. So I want to be able to create accurate cost models so I know what to charge the agencies for their usage. It won't be 1:1 but it will be something.

Thanks (b) (6) The meeting yesterday went well. It's very likely we will go with a reseller. Targeting June at the moment.

I'm getting a list of AWS resellers from OCSIT as we speak. What I care about is that there is no intermediation on a technical level. That from the perspective of a developer or a sysadmin, it's as if they purchased AWS off the street. From developer my perspective, I want to make sure I have full access to the billing console [especially the new one you just launched].

Is that the case with most resellers?

Noah, I am out in an all hands this afternoon, but will check on your options here and will respond on Monday if that's OK?

Also, here's a link to all our resellers and the fed contracts they hold:
<http://aws.amazon.com/contractcenter/>

Hi Noah!

Sorry it took me a couple of days to follow up – we were in an all hands meeting yesterday and had to pay \$10 every time we used our laptops or phones... ☺

(b) (6), copied here, can help you get invoicing set up and discuss other payment options and logistics to help you guys get going. Just let him know what you need!

Noah:

I've confirmed that this is all doable. You will want to state clearly when dealing with the resellers that you will require Business level support direct from AWS, and full access to billings data via the new billings console in order to assess overall infrastructure costs.

Hi Noah,

Apologies for the chase but wanted to check in on your availability over the next couple days. Do you happen to have availability tomorrow or Monday, 4/3 for a 1 hour call?

Thanks!

Thank you, (b) (6) for the introduction.

Hi Noah,

Pleasure to virtually meet you! As (b) (6) mentioned, Metia's main task is producing the upcoming case study on Veris Group and 18F with AWS. We'd love to set up an informal, 1-hour interview call with you and your team (if applicable) to discuss the details. Could you please provide your availability for the remainder of this week and next week? Once we finalize on a date and time, I'll send a meeting invite which will include the dial in information.

Please let me know if you have any questions or concerns in the meantime!

Regards,

(b) (6)

Subject: AWS WWPS & Metia :: Interview Call

Good afternoon Noah – hope all is well! I wanted to make a quick introduction to (b) (6) (Metia, on behalf of Amazon for a customer use case), they will be supporting the AWS customer use case on your recently approved

18F FedRAMP PATO.

He will be looking to schedule some time with you in the near future (as they did with us), to walk through your business case and outcomes with the FedRAMP accreditation.

(b) (6) Noah – intro's

I will let you take it from here to schedule some additional time. We will be standing by with any questions.

Thanks!

Pleasure to virtually meet you! As (b) (6) mentioned, Metia's main task is producing the upcoming case study on Veris Group and 18F with AWS. We'd love to set up an informal, 1-hour interview call with you and your team (if applicable) to discuss the details. Could you please provide your availability for the remainder of this week and next week? Once we finalize on a date and time, I'll send a meeting invite which will include the dial in information.

Please let me know if you have any questions or concerns in the meantime!

Regards,
(b) (6)

Subject: AWS WWPS & Metia :: Interview Call

Good afternoon Noah – hope all is well! I wanted to make a quick introduction to (b) (6) (Metia, on behalf of Amazon for a customer use case), they will be supporting the AWS customer use case on your recently approved 18F FedRAMP PATO.

He will be looking to schedule some time with you in the near future (as they did with us), to walk through your business case and outcomes with the FedRAMP accreditation.

(b) (6) Noah – intro's

I will let you take it from here to schedule some additional time. We will be standing by with any questions.

Thanks!

Hi Noah,

Thank you for the response. Unfortunately we're unavailable at that time but have availability on Thursday and Friday of this week. Let me know if you have a time slot that works for those days.

Regards,

Great, thanks Noah!

We have a member from the KMS team lined up for 2-2:30pm EST for this Wednesday

Are there specific questions we can relay to the KMS team ahead of time? Just want to make sure we're getting everything answered for you guys.

Thanks,

Noah,

Here's two docs the KMS team passed along just to provide some background before tomorrow's meeting.

Do you have a meeting room or should we just plan on meeting you in the 18F area tomorrow?

Thanks and look forward to meeting!

We need to review the backend crypto-design, and evaluate the "worst case" scenario in the case of compromise on the AWS side.

Hi,

I just received confirmation from Amazon that they cannot get the paperwork signed until 1/31/2017 (see below) so even if we received an MOU today the transfer would not go through in time. We must shut down the account tomorrow by 3pm. I need your reply to this email that you understand and approve.

Thanks,

March AWS FedRAMP Working Group

March AWS FedRAMP Working Group

Good Afternoon,

Please join us for a FedRAMP Inter-Agency Amazon Web Services (AWS) Working Group. This Working Group serves as a collaborative Inter-Agency forum to review and discuss AWS cloud services.

AWS will be hosting the event at 601 New Jersey Ave NW, Suite 900, Washington DC. Agenda topics are below; thank you for your continued FedRAMP partnership.

Meeting: March AWS/FedRAMP WG

Date: Wednesday, March 29, 2017

Time: 3:00– 3:45PM EST

Location: Amazon Web Services

601 New Jersey Ave NW

Suite 900, Washington, DC 20001

Conference Room: Pushinka

Agenda:

3:00 – 3:05 Introductions/Roll Call

3:05 – 3:15 Announcements and Status of New Services – Greg Herrmann (AWS)

3:15 – 3:45 ConMon – Ted Steffan, Minh Tran, Elise Murphy (AWS)/ Michael Carter (Coalfire)

March AWS FedRAMP Working Group

Wednesday, March 29, 2017

3:00 pm | Eastern Daylight Time (New York, GMT-04:00) | 45 mins

Hey Ric -

They're working with us on everything, but "through" Aquilent as the AWS re-seller. That relationship will change as we get close to concluding our IAA with DHS to work on the HSIN project mentioned above.

The difference in the USCIS setup would be that they aren't working on the actual applications or databases. This is just for physical access for meetings and such. And my experience was that once I had my GSA PIV card worked out, it was very simple for me to get DHS to give me physical access for the buildings we go to.

@(b) (6)(b) (6) - I'll circle back with Ric off thread and get back to you with options. Before we start on HSIN and FISMA High-High-High, it would be awesome to have this sorted.

On Thu, Mar 19, 2015 at 4:05 PM, Ric Miller - XFC <richard.l.miller@gsa.gov> wrote:

Hi All - I'm not aware of an agreement between GSA and DHS that truly makes it 'easy' to share clearance info.

In fact, we had to fill out a mess of forms and link up DHS/USCIS and GSA Security to share clearance info for our staff to simply work on a project we were hired to do.

And Noah is right in that we don't have a direct business relationship, so are not comfortable sponsoring.

(b) (6)(b) (6) - Which GSA program office are you working with (POC)? Maybe we can get them in touch with the GSA Security person we've used in the past.

Thanks,

Ric

Noah, I noticed that the DHS instances still have not had their keys rotated. You lose connectivity tonight if you do not act. Several appear to be prod instances.

Subject: AWS & RDS SSL Certs

Tod & Noah:

FYI that RDS customers using SSL/TLS will need to update their SSL certificates or their databases will become unreachable after 3/23 20:00 UTC when the old certificate expires.

Here's the important part: In order for the certificate update to work, the DB instance needs to be rebooted. AWS will not reboot customer databases for the certificate. Therefore, affected customers need to do this before 3/23 at 20:00 UTC.

Note:

. This does not affect GovCloud or Oracle RDS . New DB instances are created with the new certificate .
Additional FAQs and Technical information:

Hi Noah,

Do you have a few min to chat with Millennium Challenge Corporation?

They are trying to weigh their options on how to get to AWS and would value your input. The Account Rep here said they mentioned the GSA IaaS Vehicle that was set up years ago, but we are hoping the steer away from that and consider working with you. Would you be willing to speak to them? If so, I will loop you in with the other Account Rep here at AWS....

Thanks,
